

It is the responsibility of the person installing the electrical equipment to ensure that the installation meets the requirements of the IET wiring regulations and is therefore 'fit for purpose'. Factors such as correct selection of components, cable sizing, protective devices and Earth bonding are all critical and should be checked prior to full testing and power-up. Any other regulations applicable to the equipment being installed such as the Machinery Directive and current health and safety legislation must also be adhered to.

All connections (including factory made) must be checked for the correct tightness prior to commissioning of the electrical installation. All connections should be inspected periodically to ensure correct tightness.

DO NOT USE POWER TOOLS ON THESE PRODUCTS

Stainless Steel Padlock Hasp

Part Number: ATLAS-CBC-13-IN

Code	Product Description
ATLAS-CBC-13-IN	Lock for securing a padlock device, STAINLESS steel

22mm Locks and Hinge Pins

Part Number: ATLAS-***-**

Code	Product Description
ATLAS-CDB-10	Double bar lock (standard)
ATLAS-CML-12	Lock with manual handle and key
ATLAS-CML-12-DEA	Keylock with butterfly handle
ATLAS-EJB-B	Door Hinge Pin
ATLAS-LLD-10	Key only for standard ATLAS-CDB-10 lock

NON-METALLIC hinge pins that will prevent any kind of corrosion and rust.

Quick, TOOL-LESS installation which allows multiple install/removal as many times as necessary and facilitates working on the door and the enclosure body separately.

Additionally, the hinges will remain hidden, enable 180* door opening and this flexibility will help prevent the doors from breaking.
