# Bellini
## Panel range

*Model BLP106-3*

*Model BLVP8*

*Model BLP2*

**Audio**

**Audio and Keypad**

**Video**

**The bellini panels are designed for installations in low-rise apartments, maisonettes and conversions making them an ideal choice for the private building sector. The range currently includes audio, audio combined with a keypad and video panels.**

All panels are manufactured from anodised aluminium in a contemporary design and have black plastic trims with contrasting chromed push buttons and speech grill. The front panels are hinged from the back box for ease of installation and the hinges can easily be changed from one side to the other to assist in tight locations.

*Innovative hinged assembly for ease of wiring*

The bellini video panels include a CCD colour camera for connection to the bellissimo video system.

The bellini audio combined panels include an integral model C106 keypad for a residents' coded access facility.

Optional nameplate illumination is available with the model BLP-LAMP lighting module.

Panels do not include the speech unit and a model 61 speech unit should be ordered with each panel.

The bellini panels can be purchased independently or as part of a packaged system. Three styles of panel are immediately available;
- Audio panel; 1, 2, 3, 4, 6, 8, 10 and 12 buttons
- Audio and video panel; 1, 2, 3, 4, 6 and 8 buttons
- Audio panel with integral keypad; 1, 2, 3, 4 and 6 buttons

**Bellini Panel Dimensions (mm) panels up to 3 buttons are single push buttons, panels shown are double push buttons.**
